# Revision Record

| Date | Version | Revision |
|------|---------|----------|
| 11/29/2023 | 1.0.0.2.11.R6 | 1.Add manual configuration of DC under TDR<br>2.Add calibration overwrite function<br>3.Optimize synchronization of external triggers for pulse measurements |
| 9/22/2023 | 1.0.0.2.11.R1 | 1. Fixed the range limits for frequency and power in mixer measurements<br>2. Fixed the trace title bar color to match the memory trace color |
| 7/10/2023 | 1.0.0.2.11 | 1. Added Pulse modulation function |
| 3/2/2023 | 1.0.0.2.10.R10 | 1. Added user manual calibration and verification function (option)<br>2. Added the function that the number of vertical grid can be set<br>3. Added the function of supporting logarithmic display of vertical coordinates<br>4. Added point limit function |
| 11/11/2022 | 1.0.0.2.10.R9 | 1. Added scalar mixer measurement function<br>2. Adjusted and optimized the spectrum analysis measure interface |
| 9/30/2022 | 1.0.0.2.10.R8 | 1. Added Freq Offset function<br>2. Optimized some functions of spectrum analysis<br>3. Added status bar to display smooth status<br>4. Added advanced mode for bandwidth search, support frequency percentage bandwidth setting function<br>5. Optimized the Marker->Delay algorithm |
| 7/5/2022 | 1.0.0.2.10.R5 | 1. Added independent configuration function of emission source in spectrum mode<br>2. Optimized the sweep process<br>3. Optimized TDR interface<br>4. Added command for transferring file data<br>5. Added marker->SA commands |
| 3/29/2022 | 1.0.0.2.10 | 1. Added spectrum analyzer option<br>2. Fixed input bug in network configuration window<br>3. Fixed mouse click input box crash bug<br>4. Increased the touch-sensitive area of the DHCP checkbox<br>5. Modified the policy when the DHCP request fails |

| Date | Version | Revision |
|------|---------|----------|
| 12/29/2021 | 1.0.0.2.9.R5 | 1. Solved the menu button is not updated when the electronic calibration module is inserted or removed<br>2. Fixed a bug that the touch screen may crash under some cases<br>3. Fixed an option installation bug |
| 11/25/2021 | 1.0.0.2.9 | 1. Added some SCPI commands<br>2. Solved memory leaks and crashed in some cases |
| 9/28/2021 | 1.0.0.2.8 | 1. Add shortcut buttons at the toolbar<br>2. Fix the stuttering problem when adjusting the brightness of the grid in the waveform area<br>3. Solve the problem of probabilistic crashes when opening dialogs<br>4. File storage shortcut keys support more types<br>5. Support more power meters<br>6. Add picture editing function to the screenshot dialog<br>7. Adds peak reference function for bandwidth search<br>8. Modify the contents of the Chinese and English help files<br>9. Modify the user receiver calibration process<br>10. The input box will pop up automatically when using the toolbar button to add Marker |
